

# HEAT WAVE

heat wave hydro preliminary data sheet : SMALL

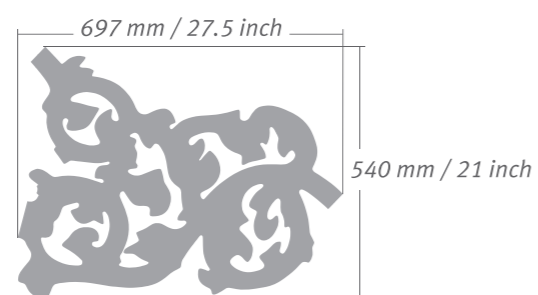

## dimensions

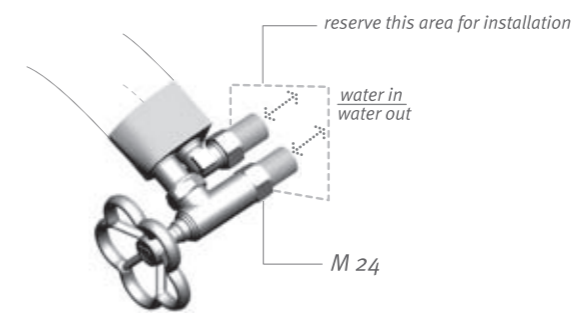

## technical info

material: polyconcrete  
 colour: stone grey  
 output: 200 watts  
 available: Spring 2007

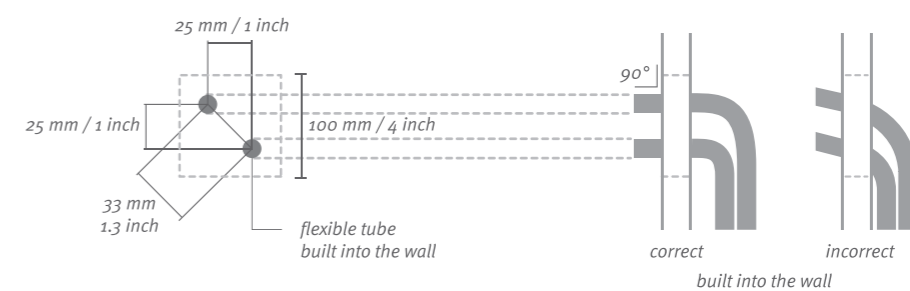

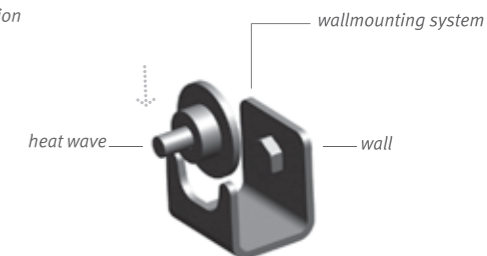

1 x single module (14 kg / 30.8 pound)

## installation

## connection to the wall

## designed by Jaga & Joris Laarman

In principal the 'heat wave' can be seen as a continuously curved tube. Therefore the air is not vented at the appliance itself but in the system. (e.g. boiler, manifold, pipework)
